Table of Contents
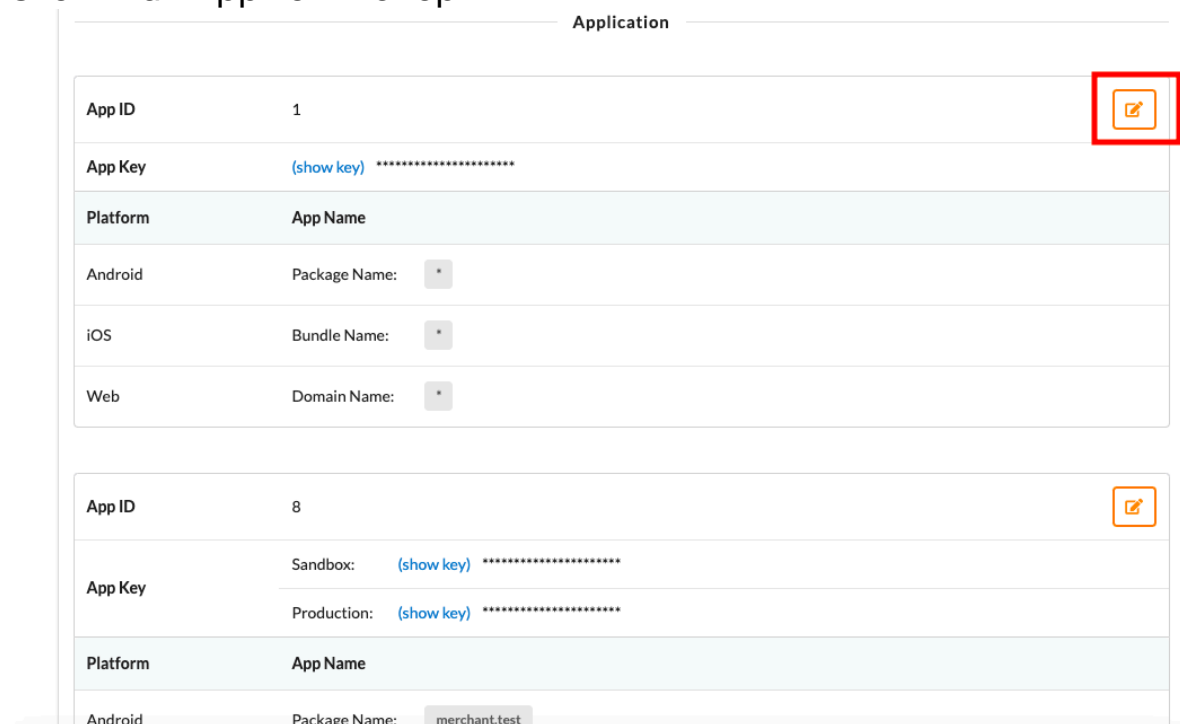

Portal

App Registration

1. Log in to your Portal account.

2. Select "Application" in Developer.

3. Click "Edit App" on the top.

4. Input the appropriate information.

    Bundle name represents the unique identifier of the application.
    Domain name represents the URL of the website. You may separate
    multiple domains with semicolons(;).

5. You may view your app ID, app key, and bundle name here.

Merchant Registration

1. Log in to your [Portal account](#).

2. Select "Create Merchant" on the left hand side.
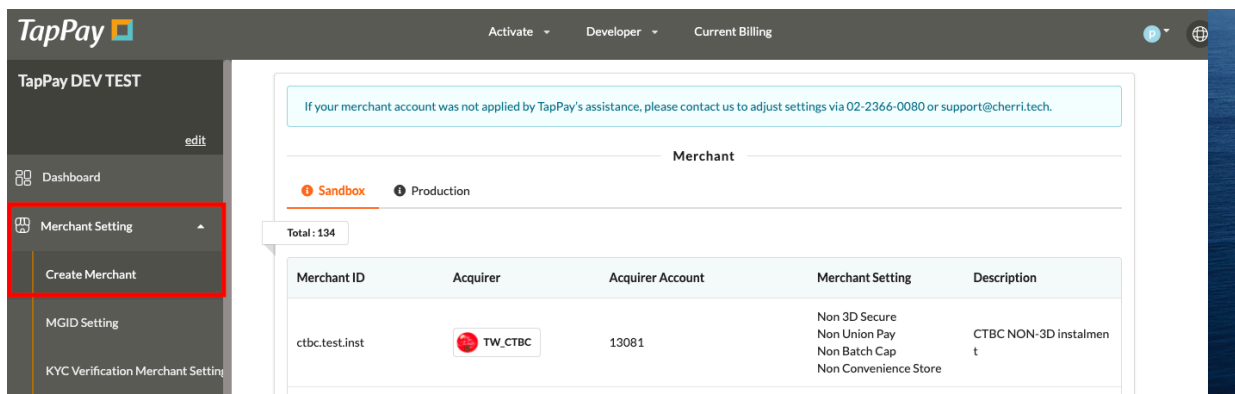

3. Click "Create Merchant" on the top.

   You may not create new merchants in Sandbox environment. Please use the preexisting merchants instead.

4. Input the appropriate information.

Name	Usage
Connected Acquirer*	Acquirer bank or payment processor.
Acquirer Account*	Acquirer account number.

Create New Merchant

1 Fill the merchant info	**2** Fill the card number	**3** Merchant Test Result

Description

_____

Connected Acquirer *

☒ TAISHIN INTERNATIONAL BANK   ▾

☐ **Enable 3D Secure** **(If enabled, only 3D Secure redirect transaction is supported)**

☐ **Create Sub Merchant**

Merchant ID *
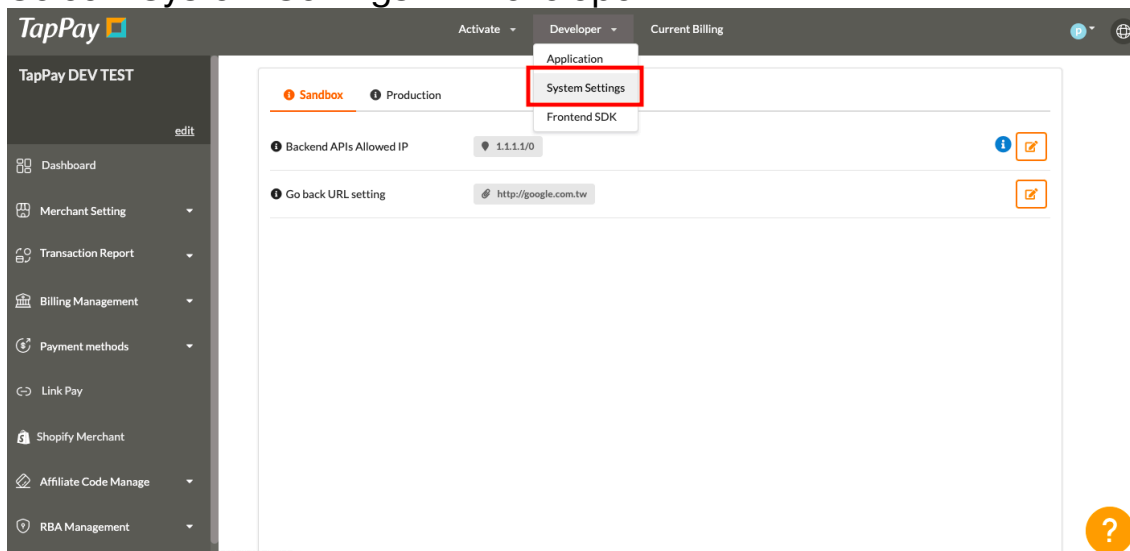

Account ID provided by Acquirer, Bank or Processor
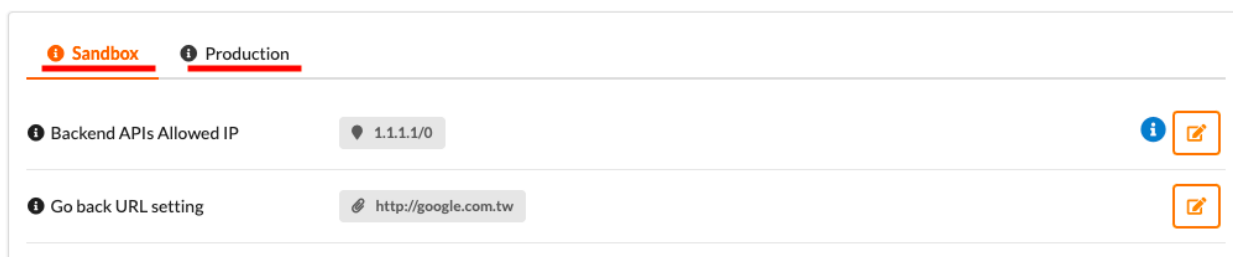

Submit   Cancel

IP Registration

*Please bind your server's IP address to our server first before testing.

1. Log in to your Portal account.

2. Select "System Settings" in Developer.

3. Select the correct environment.

    Make sure you choose the right environment on the top.
    Sandbox environment does **NOT** share the same allowable IPs as
    production environment.

4. Input your IP.
    This list will bind your server's IP address to our server.
    You may separate multiple IPs with semicolons(;).
    The number after the backslash indicates subnet mask(0~32).
    Each IPv4 address consists of 32 bits: 8bits.8bits.8bits.8bits
    So, the range of all IPv4 addresses, in dot-decimal notation, falls between
    0.0.0.0 ~ 255.255.255.255
    The subnet mask determines the number of bits that must match your IP
    address.

Please refer to the following example:

| IP	Subnet Mask	Acceptable IP
1.2.3.4/0	0	0.0.0.0 ~ 255.255.255.255
1.2.3.4/8	8	1.0.0.0 ~ 1.255.255.255
1.2.3.4/16	16	1.2.0.0 ~ 1.2.255.255
1.2.3.4/24	24	1.2.3.0 ~ 1.2.3.255
1.2.3.4/32	32	1.2.3.4

People Registration

1. Log in to your Portal account.
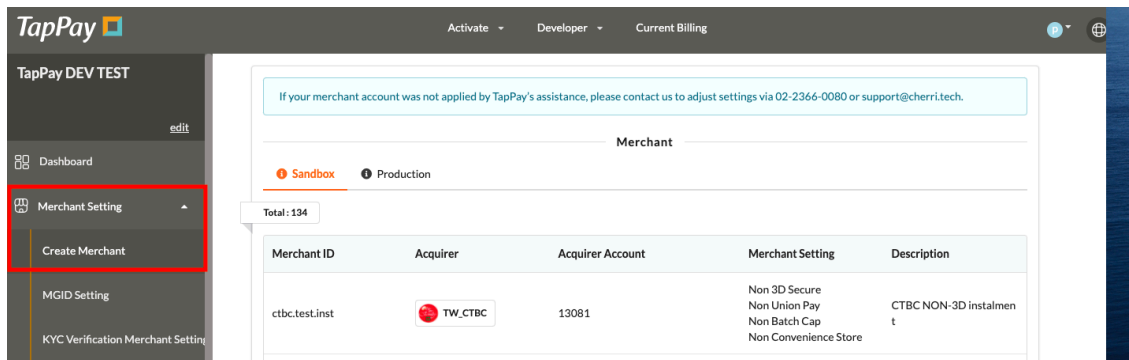

2. Select "Account Management" on the top.

3. Click "Create People".

4. You may register new accounts and alter their permission status.

   You may use our default options or change the permission yourself.

Merchant Notification

1. Log in to your Portal account.

2. Select "Create Merchant" on the left hand side.

3. Select the merchant you wish to enable this feature.

4. Input the appropriate information.
